

# Thank you...

October 22, 2020

Dear Mike, Ben, and Everyone at Oasis,

When I brought my fragile, traumatized sister, Julia Carrigan, to Oasis, I was looking for Utopia, and I found it. What Julie needed the most, was the opportunity to walk freely in an unrestricted environment, and to be surrounded with tender, loving care. These needs were met by the staff members at every level. Everyone became her friend and her care giver. Oasis became her home, and both she and I felt secure because she was safe and healthy.

Julia and I are most grateful for the consistent high level of care and caring that was showered on her, and the dignity with which she was treated. Eating meals at a table, participating in religious services, being able to walk freely through the public areas and make friends with residents and staff gave her the sense of normalcy and independence that she needed as she adjusted to a whole new way of life.

Last month, Julia joined the Dodge Park family, and despite the restrictions on family visits imposed by the Corona virus, she seems to be adjusting well. Julia's family looks forward to the day when we can visit freely, and meet Julie's new friends and care givers in person. We continue to be grateful for the care and the kindness she is being shown – the valuable continuum of care at Oasis and Dodge Park.

Very Truly Yours,

Patricia Reardon
